## **LANGUAGE SKILLS**

Mandarin Chinese (Native); English (Advanced)

## **RESEARCH PROJECT**

I am currently working on cross-national analyses of housing wealth, debt, and economic insecurity, focusing on when housing functions as a financial buffer and when it becomes a burden for households. My research also examines the uneven experience of housing and economic insecurity across social groups, life-course stages, and household structures, and I will further explore how housing wealth and related financial advantages are transmitted across generations within different welfare and housing regimes.
