

Discover our training programmes in computer science

We develop talents

FSTM has a key mission: attract and train the talents that Luxembourg and the world will need in the STEM fields (Science, Technology, Engineering and Mathematics) as well as in Health and Life Sciences.

The Faculty of Science, Technology and Medicine (FSTM) at a glance

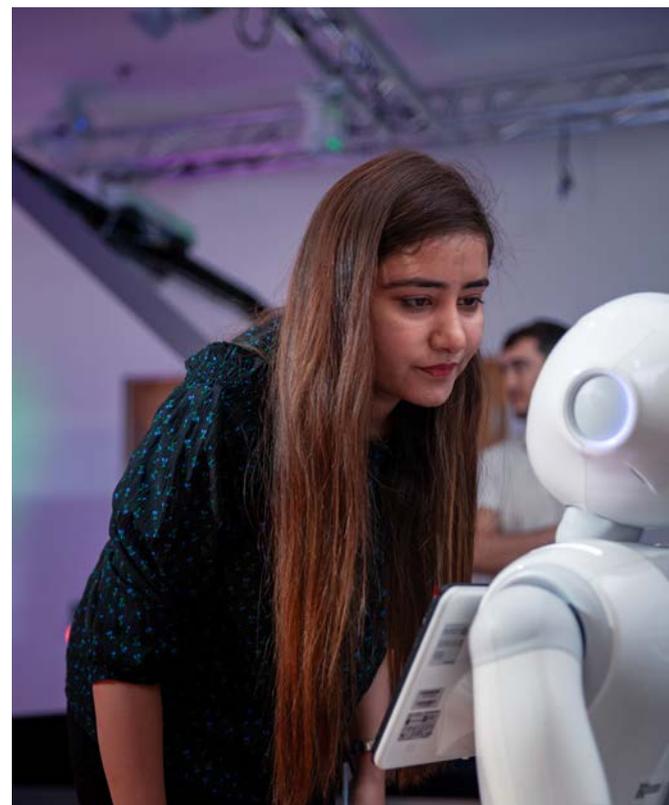

The Faculty of Science, Technology and Medicine (FSTM) contributes multidisciplinary expertise in the fields of Mathematics, Physics, Engineering, Computer Science, Life Sciences and Medicine. Through its dual mission of teaching and research, the FSTM seeks to generate and disseminate knowledge and train new generations of responsible citizens, in order to better understand, explain and advance society and environment we live in.

Why study Computer Science?

Booming ICT sector: Luxembourg waits for you!

DIGITAL PIONEER

Luxembourg is already a prime location for companies from the ICT sector, which value guidance and modern infrastructures. ICT specialists represent 6.7% of Luxembourg's domestic employment which ranks third in the European Union.

ARTIFICIAL INTELLIGENCE

In a digital world filled with data, artificial intelligence (AI) has the potential to revolutionise human life like few other technologies did before. This is why Luxembourg got into artificial intelligence to become one of the most developed digital societies. The strategic vision of Luxembourg is based on the country's ambition to position itself as a pioneer in the digital field.

DATA ECONOMY

High performance computing, high performance data analysis and artificial intelligence are cornerstones of European, national and university strategies. The new generations of

supercomputers coupled with the existing high-level expertise in the field will boost research.

CYBERSECURITY

Luxembourg thinks of information security as a major factor of economic attractiveness. Luxembourg ranks the 11th in the world on the Global Cybersecurity Index, and is the promoter of many collaborative projects in this field.

MAJOR PLAYERS

Luxembourg has succeeded in attracting major international players, such as Amazon, eBay, Google, PayPal or Skype, as well as many other companies specialised in online video games or digital books. In addition, Luxembourg includes highly efficient local players in electronic security (LuxTrust) and high-speed connectivity (Post Luxembourg, Data Center Luxembourg, etc.).

Crucial need of ICT staff: get a Bachelor or more!

The country's share of ICT specialists and graduates is higher than the EU average, but there is still a shortage of ICT specialists¹. Companies have high training requirements. "BAC +2" is the minimum. University graduates are the most sought-after: 60.4% job offers require a Master degree or PhD, 29.4% require a Bachelor degree².

¹ Source : Digital Economy and Society Index (DESI), 2022

² Source: Report : « ICT: Jobs with a future! », 2022

For the period 2022-2024, 687 new hires are planned for Luxembourg as: programmer, systems administrator, business analyst, network administrator, system engineer, project/product manager, helpdesk support technician, software architect, customer support technician².

Excellent ICT training Join our University!

By joining us, you will benefit from many advantages:

COMPLETE TRAINING OFFER

We offer multilingual Bachelor, Master, doctoral and vocational training programmes in computer science with applied or research orientation.

EFFICIENT METHODOLOGY

Our courses provide you with a thorough understanding of the fundamentals and their application, emphasising rigour and practical relevance. Multidisciplinary approach is privileged promoting knowledge sharing and exchange of experiences. In addition, project work is central: you will work in teams.

EXCELLENT ENVIRONMENT

You will join small classes, benefit from individual supervision and work with state-of-the-art equipment. You will have the chance to learn from internationally renowned professors and experts from the field.

You will enjoy a multicultural environment as both students and faculty members come from many different countries.

CLOSE COLLABORATION WITH RESEARCH

Early involved in research project, you will work with staff conducting latest research, gaining in-depth knowledge from experts working at the forefront of the subject. The Department of Computer Science (DCS) conducts fundamental and applied research in the area of computer, communication and information sciences.

STRONG LINKS WITH INDUSTRY

We work closely with industry, enabling you to acquire knowledge and experience from leading companies, including working with industrial mentors and the opportunity to spend time with them on internships. Thus, Luxembourg offers unique opportunities to study and work in the field of computer science. Join the University of Luxembourg now!

60 ECTS

DOCTORAL EDUCATION

Doctoral Programme in Computer Science and Computer Engineering

RESEARCH + 20 ECTS

Bachelor in Computer Science

180 ECTS

This Bachelor provides the bases on the three following main dimensions: creativity to be able to generate new ideas; science to acquire precise knowledge determined using observations, experimentations, reasonings, expressions and digital technologies to rely on electronic devices and get used to process information.

STRENGTHS

- Pedagogy based on acquisition by practice through research and development projects
- Scientific quality to enhance your interest and strengths in science and technology for the future
- Strong links with national stakeholders

ADMISSION REQUIREMENTS (75 PLACES)

- Degree: Secondary school diploma
- Language: B2 in English

STUDY OPPORTUNITIES

- Master in Computer Science or related field

Programme at a glance

- Duration: 3 year full-time programme/ 6 semesters (180 ECTS)
- Language: English
- Registration fees: 400€/semester
- Available places: 75
- Application period:
 - > For EU students: February-July
 - > For non-EU students: February-March

“I chose this Bachelor because of the international setting, high standards of scholarship, dynamic research and dedication to future lives of significance. I wanted to learn the fundamentals of the revolutionary aspect dominating our everyday lives. I really enjoyed the collaboration with researchers on various scientific and technical projects. This teamwork increases project management skills which are vital for business organisations.”

Desislava Marinova, IBM

Bachelor in Applied Information Technology

180 ECTS

This Bachelor presents a dynamic and hands-on curriculum designed to equip students with practical skills essential for a seamless transition into the workforce upon graduation, whether in the public or private sector. This programme not only imparts fundamental skills but also instills a foundational knowledge base, laying the groundwork for ongoing education and sustained professional growth.

STRENGTHS

- Professional training
- Progressive specialisation
- One semester internship in a company

ADMISSION REQUIREMENTS (75 PLACES)

- Degree: Secondary school diploma
- Languages: B2 in English, B1 in French

STUDY & CAREER OPPORTUNITIES

- Master in Computer Science or related field
- Network administrator, IT developer, software engineer, webmaster in all business sectors

EXAMPLES OF ALUMNI CAREERS

- IT auditor, Arcelor
- Information security officer, Baloise Luxembourg
- Software developer, NATO
- Business analyst, ARHS Consulting
- Software Engineer, SES

Bachelor in Applied Information Technology

180 ECTS

Continuing Education Programme

This Bachelor offers a two-year programme for a continued professionalisation in IT that responds to the expectations of employers and employees who want to validate and reinforce their professional skills in the IT domain. The Bachelor is designed to conciliate professional life and learning with the organisation of evening courses during the week and individual or project-based learning activities.

STRENGTHS

- Learning of methods for the design and analysis of IT systems
- Mix of basic fundamental IT skills as well as competences in special areas
- Development of skills to independently adapt and extend their expertise

ADMISSION REQUIREMENTS (25 PLACES)

- Degree: Bac+2 with min. 3 years of experience or diploma of secondary school or technician diploma with min. 6 years of experience
- Languages: B2 in English and B1 in French

STUDY & CAREER OPPORTUNITIES

- Developer, IT analyst, administrator, web manager
- Master in Computer Science or related field

In collaboration with:

**LUXEMBOURG LIFELONG LEARNING CENTRE**
LA FORMATION CONTINUE DE LA CHAMBRE DES SALARIÉS**CHAMBRE DES SALARIÉS LUXEMBOURG**

Master in Information and Computer Sciences

120 ECTS

This Master enables students to acquire deeper knowledge in computer science by understanding its abstract and interdisciplinary foundations, focusing on problem solving and developing lifelong learning skills.

STRENGTHS

- Flexible specialisation options
- Early involvement in research projects
- International cooperation agreements with universities and industries

ADMISSION REQUIREMENTS (40 PLACES)

- Degree: Bachelor in computer science or related field
- Language: B2 in English

STUDY & CAREER OPPORTUNITIES

- Data analyst, data scientist, software engineer, consultant, chief technology officer, IT specialist, teacher, systems architect, machine learning engineer, security engineer
- PhD in computer science

EXAMPLES OF ALUMNI CAREERS

- Chief information security officer, Restena Fondation
- Chief technology officer, LuxProvide
- Data scientist, Goodyear
- Software engineer, Talkwalker
- Product and engineering manager, McKinsey & Company
- Research Engineer, Meta AI

Master in Space Technologies and Business

120 ECTS

This collaborative Master programme is developed with the Luxembourg Space Agency, aiming to generate a talent pool of professionals able to answer the diverse needs of the booming commercial space industry. Growing innovations in space exploration and exploitation require professional figures able to manage the technical side, as well as the business side, of complex space missions and operations. It features technical and business lectures from experienced academic staff, as well as external experts from the commercial space industry.

STRENGTHS

- Interdisciplinary training
- Technology and business focused learning
- Problem-based learning approach using cutting-edge facilities

ADMISSION REQUIREMENTS (20 PLACES)

- Degree: Bachelor's degree in computer science/informatics, electrical/mechanical/telecom/aerospace engineering, physics, mathematics. Candidates with a Bachelor in another domain but with several years' experience in space, aerospace, mechanical, electrical, industrial, or robotics engineering may also be eligible for this programme.
- Language: B2 in English

STUDY & CAREER OPPORTUNITIES

- Engineer, researcher, project manager
- PhD in space engineering, telecommunications or informatics

In collaboration with:

Programme at a glance

“Studying space at the University felt both challenging and inspiring. I was not just learning theory but collaborating, experimenting and gaining confidence in a field that is shaping the future. It truly feels like a programme that prepares you to make an impact.”

Liz Schreiner,
Space Systems Engineer, Yuri Lux

Master in High Performance Computing

120 ECTS

The Master in High Performance Computing (MHPC) is a unique program at the intersection of parallel programming, hardware architecture, computational science and artificial intelligence. High-performance computing (HPC) is an expanding and multi-disciplinary field aiming at programming and deploying algorithms for large parallel computers. The recent success stories of artificial intelligence such as protein folding (AlphaFold) and generative AI (ChatGPT) are backed by tremendous computational power. In the MHPC, you will learn to harness this power and develop skills in parallel computing. The cherry on the cake? HPC is a flagship of the Luxembourg economy, and thus strongly supported by labour market players.

STRENGTHS

- Outstanding knowledge from the best experts in HPC education in Europe
- Possibility of dual degree with partner universities
- Opportunity for internship in industry and supercomputing centres

In collaboration with:

ADMISSION REQUIREMENTS (40 PLACES)

- Degree: Bachelor in computer science or related field
- Knowledge of programming, data structures and algorithms
- Comprehensive training in technical mathematics
- Language: B2 in English

STUDY & CAREER OPPORTUNITIES

- HPC system engineer, parallel software developer, solution architect, HPC user support engineer, DevOps engineer, research support engineer
- PhD in computer science

Programme at a glance

- Duration: 2 year full-time programme/ 4 semesters (120 ECTS)
- Language: English
- Registration fees: 400€/semester
- Available places: 40
- Application period:
 - > For EU students: February-July
 - > For non-EU students: February-March

Master in Cybersecurity and Cyber Defence

120 ECTS

The Master offers an interdisciplinary set of skills to prepare students in the emerging sectors of cybersecurity and cyber defence. It embraces subjects rooted in computer security but, more ambitiously, offers training in different and complementary academic disciplines to ensure a foundational understanding of information security as well as information security management and cyber defence operational skills. Through problem-based learning, students will build their capacity to evaluate, manage, and resolve critical issues, and will learn to communicate effectively with specialists and non-specialists alike.

STRENGTHS

- Interdisciplinary theoretical and practical training and education
- Innovative and foresighted programme
- Two profiles: research- and operation-oriented
- Compliant with the European Cybersecurity Skill Framework
- Strong connection with cybersecurity organisations

ADMISSION REQUIREMENTS (40 PLACES)

- Degree: Bachelor in computer science or related field. Bachelor in other sciences with knowledge informatics are also welcome.
- Language: B2 in English

STUDY & CAREER OPPORTUNITIES

- Cybersecurity system architect, engineer, tools operator and developer; CISO; intelligence and forensic analyst and auditor; cybersecurity risk and incident manager; policymaker
- PhD/research career in cybersecurity and cyber defence

In collaboration with:

Programme at a glance

- Duration: 2 year full-time programme/ 4 semesters (120 ECTS)
- Language: English
- Registration fees: 400€/semester
- Available places: 40
- Application period:

Erasmus Mundus Joint Master in Cybersecurity

120 ECTS

This Master enables students to acquire very good knowledge in cybersecurity by designing and developing secure products and security architectures; testing the resistance of software, products and embedded systems to the latest cyberthreats. Students have the opportunity to specialise in IoT or software cybersecurity and develop their skills via an internship in the field of cybersecurity.

STRENGTHS

- Double degree
- 2 specialisations: IoT cybersecurity (Université Libre de Bruxelles) or software cybersecurity (University of Luxembourg)
- Internship in industry or similar

ADMISSION REQUIREMENTS (32 PLACES)

- Degree: Bachelor in computer science or related field with 3 years of experience or a Master in a related field
- Language: B2 in English

STUDY & CAREER OPPORTUNITIES

- Cybersecurity engineer, cybersecurity analyst, security architect, security product integrator, software developer, cryptographer, malware analyst, application security expert
- PhD in computer science

In collaboration with:

Programme at a glance

- Duration: 2 year full-time programme/ 4 semesters (120 ECTS)
- Language: English
- Registration fees: 4500€/year
- Available places: 32
- Application period: until February

Master in Information System Security Management

60 ECTS

This Master allows professionals to increase their knowledge and develop their skills to analyse, interpret and provide adequate solutions in the field of information security.

STRENGTHS

- Multidisciplinary approach promoting knowledge sharing and exchange of experiences
- Participation in the Information Security Education Day (ISED)
- Programme supported by two professional associations: Club de la Sécurité de l'Information (CLUSIL) and Women Cyber Force (WCF)

ADMISSION REQUIREMENTS (18 PLACES)

- Degree: Bachelor in computer science or related field with 3 years of experience or a Master in a related field
- Language: B2 in English

CAREER OPPORTUNITIES

Information security manager

In collaboration with:

“This Master immediately appealed to me because it offers an unusual mix of skills in the three main information security topics, namely management, techniques, and most of all, the human aspects. Working at the heart of local market issues within a relational framework is very rewarding. Even today, it remains a source of inspiration for me. Finally, this Master is an ideal place to meet other professionals. An experience to be lived and full of meaning.”

Raphaël Taban,
Data Protection Officer, CTIE

Master in Technopreneurship

60 ECTS

This Master programme is highly innovative, offering a dual benefit. On one hand, it equips students with foundational knowledge on current and emerging topics in smart ICT, keeping pace with the latest technical, business and legal advancements. On the other hand, it acts as a driver of growth in the ICT industry by providing practical examples and case studies that showcase the role of technical standardization as a means to establish a common technical language, build trust, and enhance efficiency in smart ICT.

STRENGTHS

- Innovative approach with practical examples and case studies
- Wide range of topics from smart ICT technologies to digital trust aspects
- Programme supported by the Ministry of the Economy, the European Committee for Standardization (CEN) and the European Committee for Electrotechnical Standardization (CENELEC), as well as the European Telecommunications Standards Institute (ETSI)

ADMISSION REQUIREMENTS (20 PLACES)

- Degree: Bachelor in computer science or related field with 3 years of experience or a Master in a related field
- Language: B2 in English

CAREER OPPORTUNITIES

Technology officer, emerging technologies consultant, digital strategy consultant, smart ICT consultant, innovation manager, standards manager, project manager, head of innovation, head of digital strategy, and technopreneur

In collaboration with:

LUXEMBOURG LIFELONG
LEARNING CENTRE
LA FORMATION CONTINUE DE LA CHAMBRE DES SALARIÉS

CHAMBRE DES SALARIÉS
LUXEMBOURG

Programme

COURSES	ECTS
Semester 1	
Smart secure ICT and innovation	1
Smart ICT technologies	5
Technical standardisation	3
Total	9
Semester 2	
Security for smart ICT	5
Smart ICT technologies	5
Total	10
Semester 3	
Digital intelligence	2
Legal aspects	2
Management of business and technical innovation	3
Trust architectures for smart ICT	4
Total	11
Semester 4	
Master thesis	30
Total	30

Programme at a glance

- Duration: 2 year part-time programme/ 4 semesters (60 ECTS)
 - Language: English
 - Registration fees: total 6400€
 - Available places: 20
 - Application period: February-June
- Intake periods occur every two years. The next intake will be for the 2026-2027 academic year.

“I wanted to update myself with the latest developments in technology, digital trust including an entrepreneurial perspective. I liked the mix of academic and business experience of the lecturers. It helped me not only to reflect on how to deliver the finance transformation but also to create the foundation for building the business case, the change management approach and the governance.”

Joao Seixas Marques,
Vice-President Finance Transformation, RTL Group

Doctoral Programme in Computer Science and Computer Engineering

This programme provides an excellent environment for pursuing doctoral studies in computer science and computer engineering at an internationally competitive level and in broad interdisciplinary applications.

STRENGTHS

- Personal supervision by internationally leading scientists
- Immediate integration into research groups and projects
- Broad offer of transferable skills, disciplinary and interdisciplinary training

ADMISSION REQUIREMENTS

- Degree: Master in computer science or related field
- Language: B2 in English

CAREER OPPORTUNITIES

- Postdoctoral researcher, research scientist, research associate, associate professor
- Software engineer, data scientist, IT consultant, IT manager, product developer

In collaboration with:

EXAMPLES OF ALUMNI CAREERS

- Assistant professor, University of Twente
- Cyber security engineer, SES Satellites
- Engineering manager, Netflix
- Postdoctoral fellow, University of Ottawa

Programme at a glance

- Duration: 3 to 4 years
- Language: English
- Registration fees: 400€/semester
- Number of doctoral candidates: 270

Our department Computer Science

DCS at a glance

The Department of Computer Science (DCS) conducts fundamental and applied research in artificial intelligence, security, and advanced computing systems like high-performance computing (HPC), thereby contributing to digital transformation. The Department collaborates on joint interdisciplinary research projects with departments, faculties and centres at the University. Additionally, it maintains extensive research partnerships with leading institutions like the University of Oxford, ETH Zurich, and CNRS.

MEMBERS

- 22 professors
- 44 post-docs and research scientists
- 39 doctoral candidates
- 14 technical and administrative staff

FUNDING AND COLLABORATIONS

- Nearly €8 million acquired through national and international competitive grants, such as
- ERC Advanced Grant CLOUDMAP
 - EU H2020 ChronoPilot and BANANA
 - EIC Pathfinder SYMBIOTIK

PUBLICATIONS (2023)

- 46 peer-reviewed articles in scientific journals
- 110 conference papers

Research areas

The department (DCS) carries out research activities around three thematic axes:

ADVANCED COMPUTING SYSTEMS

In Advanced Computing Systems, we push the boundaries of system modeling, reliability, and scalability. Our research spans robust computing infrastructures, quantum computing integration, and high-performance computing. A major focus is on optimizing performance and energy efficiency while addressing challenges like fault tolerance in ultra-scale systems.

ARTIFICIAL INTELLIGENCE

In AI, our focus lies on exploring the theoretical foundations and developing advanced algorithms for machine learning and intelligent systems. This includes research on sparse neural networks, logic frameworks, computational interactions, cognitive robotics and legal informatics. In addition to the three core research areas, DCS created in 2023 the cross-cutting focus area "AI4EDU" to explore the potentials of AI in education, serve as a platform for interdisciplinary research and foster outreach in the field of AI literacy.

INFORMATION SECURITY

In Information Security, we conduct research in cryptography, system security, and secure implementations. Our work ranges from creating novel cryptographic primitives to defending against side-channel attacks.

Discover Luxembourg Great place to live and work

Located in the heart of Europe, the Grand Duchy of Luxembourg boasts a colourful history, stunning landscape, multicultural environment and multilingual population. The thousand year old capital and five regions each have their own unique flavour and discoveries to be made. Experience contemporary and historic culture, explore the country's hiking and cycling trails, and taste world-class cuisine and local wine.
